PURE PERFORMANCE

# DST FLOOR CLEANER

## – FROM THE DEGREASING AND PARTS CLEANING EXPERTS

DST-FLOOR CLEANER has been developed specifically to match the maintenance demands of high activity work-shop and production environments. Clean and well-maintained surroundings are key to run a smooth operation.

The unique DST-CHEMICALS® formulas, known throughout the metal fabrication industry, have been further developed into a heavy-duty floor cleaner targeting oily and contaminated shop floors.

As with everything else from DST-CHEMICALS®, the DST-FLOOR CLEANER is 100% biodegradable, water

based, pH neutral and requires no labelling. Safe for the operator and safe for the environment.

### Use everywhere

DST-FLOOR CLEANER works with all types of surfaces and floor coatings. It leaves a thoroughly cleaned shop floor on the first round of cleaning, ensuring a clear and non-slippery workspace for the work force.

DST-FLOOR CLEANER mixes into water and works with all types of floor scrubbing machines, as well as manual operations.

### Efficiency in focus

With DST-FLOOR CLEANER, you will experience the same high-quality cleanliness associated with DST-CHEMICALS® degreasers and de-rusting products. The product efficiency makes the task of floor cleaning easy and fast, saving valuable time and improving maintenance operations. It even removes the most stubborn burn marks from rubber tires.

Talk to your DST-CHEMICALS® representative about a test on your shop floor and see for yourself.

## HEAVY DUTY INDUSTRIAL FLOOR CLEANER

PRODUCT	pH	TEMPERATURE
DST-FLOOR CLEANER	9,4	from ambient temperature
